

WW Prime Products GmbH

high-quality breath test supplies

WW Prime Products GmbH presents the Oxyflow Sampling System – a fully compatible alternative to QuinTron consumables.

The system stands out for its high-quality construction and consists of precisely manufactured breathing gas vacuum tubes and an ergonomically designed sampling mouthpiece for comfortable and reliable use.

Our Oxyflow sampling system.

The intelligent alternative to QuinTron – economical, reliable, and ready for immediate use.

High-quality vacuum collection tubes for collecting and reliably transporting breath gas samples.

CE certified and compliant with applicable ISO standards – ensuring maximum quality and safety.

Oxyflow Sampling Device. Ergonomically shaped mouthpiece for comfortable and precise sample collection. Designed and manufactured in Germany to the highest quality standards.

Your claims

- Cost savings through economical solutions
- High-quality materials for reliable results
- Secure supply chains for maximum planning certainty
- No adjustments needed – integrates seamlessly into your existing workflow.

Our solution

- Validated and field-tested: Rigorously validated on QuinTron devices over more than a year.
- Efficient logistics: Local supply chains ensuring reliable, high-capacity delivery.
- 100% compatible with QuinTron systems. Plug-and-play – no adjustments required.

Your advantages

Up to 30% cost savings

100% compatible with QuinTron

Ready to use immediately – no conversion effort required

Reliable delivery without bottlenecks

Made in Germany
